Fellowships and Grant Opportunities – Intramural UCSF and Univ. California

Due Date	Source	Name	Amount	Additional Information
LOI due in January Top 5 LOIs are chosen for submission	Center for Healthcare Value	Caring Wisely™ Grant	Funds three projects annually at $50K per project	Caring Wisely™ is an organized process for engaging and supporting frontline staff and clinicians in efforts to remove unnecessary costs from healthcare delivery systems and improve the quality of care delivered. The program was created and launched by the UCSF Center for Healthcare Value in November 2012. For more information contact the Caring Wisely™ Program Manager Sarah Imershein, MPH (sarah.imershein@ucsf.edu)
Contact tobacco.fellowship@ucsf.edu for more information	Center for Tobacco Control Research and Education	Postdoctoral Fellowship	$53-64K/yr	This fellowship prepares individuals from a wide variety of backgrounds to join the next generation of academic leaders in tobacco control. Upon completion of training, fellows will be well positioned to be active participants in crucial policy debates about the future development and implementation of tobacco control interventions. The program offers supervised research experience in tobacco control with the Center faculty.

Due Date	Source	Name	Amount	Additional Information
November and May	Clinical and Translational Science Institute	Resident Clinical and Translational Research Grant	Up to $4K / academic year Application cycle – twice a year. **Funds**: Tuition, design & biostats consultation, analytic support, and study-related travel	The Resident Clinical and Translational Research Funding (RRF) program will provide up to $4,000 per academic year to UCSF residents for qualified clinical and translational research expenses not covered by their mentor or other sources. Applications require the description of the proposed project for which the funds will be used, to be conducted under the guidance of a research mentor. Applications will be accepted twice a year and the most meritorious projects will be funded.
September and March	Resource Allocation Program	Research Grant	Variable based on category	Extensive listing of funding opportunities offered.
LOI: August New applications / resubmissions: November	Tobacco-Related Disease Research Program of California	Post-Doctoral Fellowship Award	Up to $60K; 1-3 yrs Allowable direct costs include: Stipend, tuition & fees, institution allowance and travel to TRDRP conference	The Tobacco-Related Disease Research Program of California (TRDRP) administers the portion of state retail taxes on tobacco products that are designated for research within California. This unique source of funding supports investigators at eligible California institutions whose research contributes directly to the elimination of smoking and tobacco use and mitigates its human and economic costs in California.

August	UCSF	Clinical Informatics Fellowship Note: Though typically geared toward physicians who have successfully completed any ACGME/ABMS residency, UCSF DoS residents are eligible for this fellowship.	Salary support; 2yrs	The purpose of the CIF is to create health informatics leaders and includes the experience and training necessary to become a productive academic contributor, a healthcare enterprise Chief Health or Medical Information Officer (CHIO/CMIO), or a successful informatician in the world of industry. Upon completion of the CIF, graduates will take the Clinical Informatics exam administered by the American Board of Preventive Medicine and become board certified in Clinical Informatics.
March	UCSF	Clinical Research Informatics Postdoctoral Fellowship (CRISP)	Annual stipend based off NIH scale in addition to housing allowance and tuition assistance for didactic training; 1-2 yrs	The CRISP Fellowship provides tailored training for clinician investigators who seek to improve healthcare through the science of clinical research informatics. CRISP fellows will receive in-depth training in clinical research informatics and data science through coursework in the Training in Clinical Research (TICR) program in the Department of Epidemiology and Biostatistics, conduct a mentored research

				project, and participate in regular work-in-progress sessions. No prior experience in Clinical Research Informatics is required; however, this program will be most effective for those who have identified a potential project associated with an area of healthcare needing improvement.
November	UCSF Stimulating Access to Research in Residency Program	StARR Fellowship (separate NHLBI-funded and NIA-funded tracks)	StARR Program covers 80% of residents' salaries during their StARR year and provides funds to support didactic training in research. All else is covered by their residency programs or departments; 1yr	This program seeks to recruit, support and train outstanding clinical residents with the potential to become successful clinical and translational researchers. With funding from two NIH institutes, the National Heart Lung and Blood Institute (NHLBI) and the National Institute on Aging (NIA), StARR supports UCSF residents for a contiguous year (July to June), in which residents devote a minimum of 80% time to research and research-related training, while the remaining 20% of their time can be spent on patient care.
